

Global Health - Asian Medicines Modul

For members of all faculties and guest students

What is Medicine? Asian and European Knowledge Practices of Health and Disease

Seminar: 2 SWS, ECTS-Credits: 6

This seminar focuses on critical debates of relevant, socio-political subjects in medicine, health and disease in Asia and Europe. We will read, analyse and compare social and cultural anthropological theories and case studies on historical and contemporary contexts of western biomedical, Chinese and Tibetan medical practices.

Registration through OLAT starting from October 1st, 2017
